General description

This Township is level, at least much less undulating than those North of it. In the Spring season a great portion would be considered rather wet. Those places from which the water had apparently receded since the Spring floods - are marked "Beds of ponds" in the notes.

The ridge marked on the map accompanying these notes, divides the waters of the Wabash & Illinois Rivers. It is not more than 25 feet high at any point in this Township. - From this North to the Iniquois River in T. 28 N., R. 7 W. there cannot be more than 15 feet fall!! This Township contains no timber, unless the extreme S.E. corner runs into a grove now known as "Finches Grove", from the name of the most influential man in the grove. - Large Sand and Flint stone found in this as in the other

Townships.

The mounds and forts are of the kind described in T. 27 N., R. 7 W. & the other Prairie Townships.

Indianapolis Oct. 16. 1834

A. W. Morris, D. S.

I hereby certify that in pursuance of a contract with Micajah T. Williams, Surveyor General of the United States for the States of Ohio and Indiana and the Territory of Michigan, bearing date the 16th of May 1834, and in strict conformity to the laws of the United States and the Instructions of the said Surveyor General, I have surveyed and subdivided into sections Township N. 26 North, in Range N. 7 West of the 2^d Principal Meridian, in the State of Indiana.

And I do further certify that the foregoing are the true and original field notes of the said survey and subdivision, executed as aforesaid.

Certified this 11th day of September 1834
